Hotel Website Project Process

1. User is greeted by the landing page upon loading the website.
2. When the burger(icon) "menu" is clicked, the web will show a drop down containing [1]"About the Hotel", [2]"Suites", [3]"Experience".
 - 2.1. When "About the Hotel" is clicked, the page will direct user to a different page containing a brief description of the hotel.
 - 2.2. When "Suites" is clicked, the page will direct user to a different page containing the images and description of all rooms and suites.
 - 2.3. When "Experience" is clicked, the page will direct user to a different page containing the very main page.
3. When "Stay with Us" is clicked:
 - 3.1. The website will show the list of all rooms with images and description and price.
 - 3.2. When a user chose a suite from the list, they will be directed to a page containing the "Hotel Room Reservation Form" which the user needs to accomplish.
 - 3.3. Once the user submits the form, the page will show a "Confirmation Page" which shows what they need to pay for the room they reserved.

4. When “Dine with Us” is clicked:

- 4.1. The user will be directed to the list of restaurants in the hotel with images for which they can reserve a table.
- 4.2. The user will then be directed to the “Dining Reservation Form” which the user needs to accomplish.
- 4.3. Once the user submits the form, the page will show a “Confirmation Page” which shows the total cost of reservation fee which they have to pay upon billing.

5. When “Offers” is clicked, the user will be directed to a page showing the vouchers or promos the hotel presently offers.

6. When “Location” is clicked, the user will be directed to a page showing the address of the hotel as well as a map view of the location.
